Delivering the Infrastructure Nations Run On

For more than six decades, Nazir and Company has built the high-voltage networks, substations and civil infrastructure that power economies. From its headquarters in Lahore, the company delivers landmark projects for national utilities and energy leaders across Asia, the Middle East and Africa, with a reputation for engineering depth, disciplined execution and performance in the most demanding environments.

Alhaj Sheikh Nazir Ahmed founded the company in Lahore in 1958. It was incorporated as a private limited company on 12 August 1972, and holds Licence No. 1 of the Pakistan Engineering Council, the first the Council ever issued.

By the late 1970s the company was building high-voltage transmission in Iraq and Libya. It has since delivered across seven countries in Asia, the Middle East and Africa, for national utilities, energy producers and governments.

Six Decades of Delivery

From a Lahore contractor founded in 1958 to high-voltage transmission across North Africa, the Middle East and Asia.

1958 **Founded**
Established by Alhaj Sheikh Nazir Ahmed.

1970s **Work outside Pakistan begins**
The company begins work in other countries.

1972 **Incorporated**
Incorporated as a private limited company on 12 August 1972, working in civil, electrical and mechanical engineering.

1977 **First documented completions**
500 kV Tarbela–Faisalabad line foundations in Pakistan; 132 kV lines from Dukan in Iraq.

1978 **First documented projects in Libya**
Civil works for desalination plants and for 30/10 kV substations.

1979 **Saudi Arabia and Iran**
110 kV Makkah–Taif line extension; stringing of the 230 kV Shiraz–Bushehr line.

1980 **220 kV and 400 kV**
Misurata–Sirte 220 kV lines and the Tripoli ring in Libya; the 358 km Nasiriya–Wasit–Baghdad 400 kV line in Iraq.

1985 **Sheikh Tanveer Ahmed joins**
The company gains the leader who would go on to direct its operations in Libya and Saudi Arabia and guide it as Director today.

1997 **HVDC in Mozambique**
Work on the ±533 kV Songo–Apollo HVDC line for Consorzio Italia 2000.

1998 **500 kV in Malaysia**
Erection and stringing of double-circuit 500 kV lines for Tenaga Nasional Berhad.

2001 **750 km in Libya**
Turnkey 220 kV double-circuit lines from Benghazi to the eastern border.

2007 **Barotha–Rewat 500 kV**
Transmission lines for the national grid in Pakistan.

2011 **Samnu–Sebha 220 kV**
220 kV double-circuit twin-bundle line for GECOL, carrying power south to Sebha in the Fezzan.

2014 **380 kV turnkey in Saudi Arabia**
380/110 kV overhead lines and a fibre-optic network in the Makkah, Taif and Madinah area.

2020 **Fatima Jinnah Town, Multan**
Water supply, sewerage, roads and an overhead water tank for a new town, for the Multan Development Authority.

The People Behind the Delivery

DIRECTOR

Sheikh Tanveer Ahmed

Sheikh Tanveer Ahmed is the Director of Nazir and Company. He leads the company and oversees its work in Pakistan and abroad.

He joined the company in 1985.

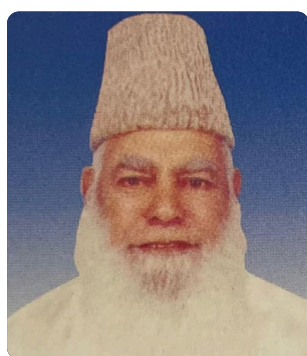

He was the company's Director in Libya from 1987 to 2002 and its Director in Saudi Arabia from 2004 to 2014.

He is a graduate of the University of Houston, Texas.

WITH THE COMPANY
SINCE
1985

DIRECTOR, LIBYA
1987–2002

DIRECTOR, SAUDI ARABIA
2004–2014

FOUNDER

Alhaj Sheikh Nazir Ahmed

1930–2005

- Established the company in 1958.
- Registered the company as the first licence holder of the Pakistan Engineering Council.
- Began the company's work outside Pakistan in the 1970s.
- Received a number of lifetime achievement awards.
- Set up schools, orphanages, dispensaries and hospitals, and headed school boards and orphanage organisations.

Key Advisers

Senior advisers in electrical, telecommunication and civil works support the company's leadership.

Syed Imran Hassan

ADVISER

Member of the company's team of advisers.

Khalid Mehmood

TELECOMMUNICATION

Adviser on telecommunication works.

Engr. Muhammad Yousaf Barakzai

CIVIL WORKS

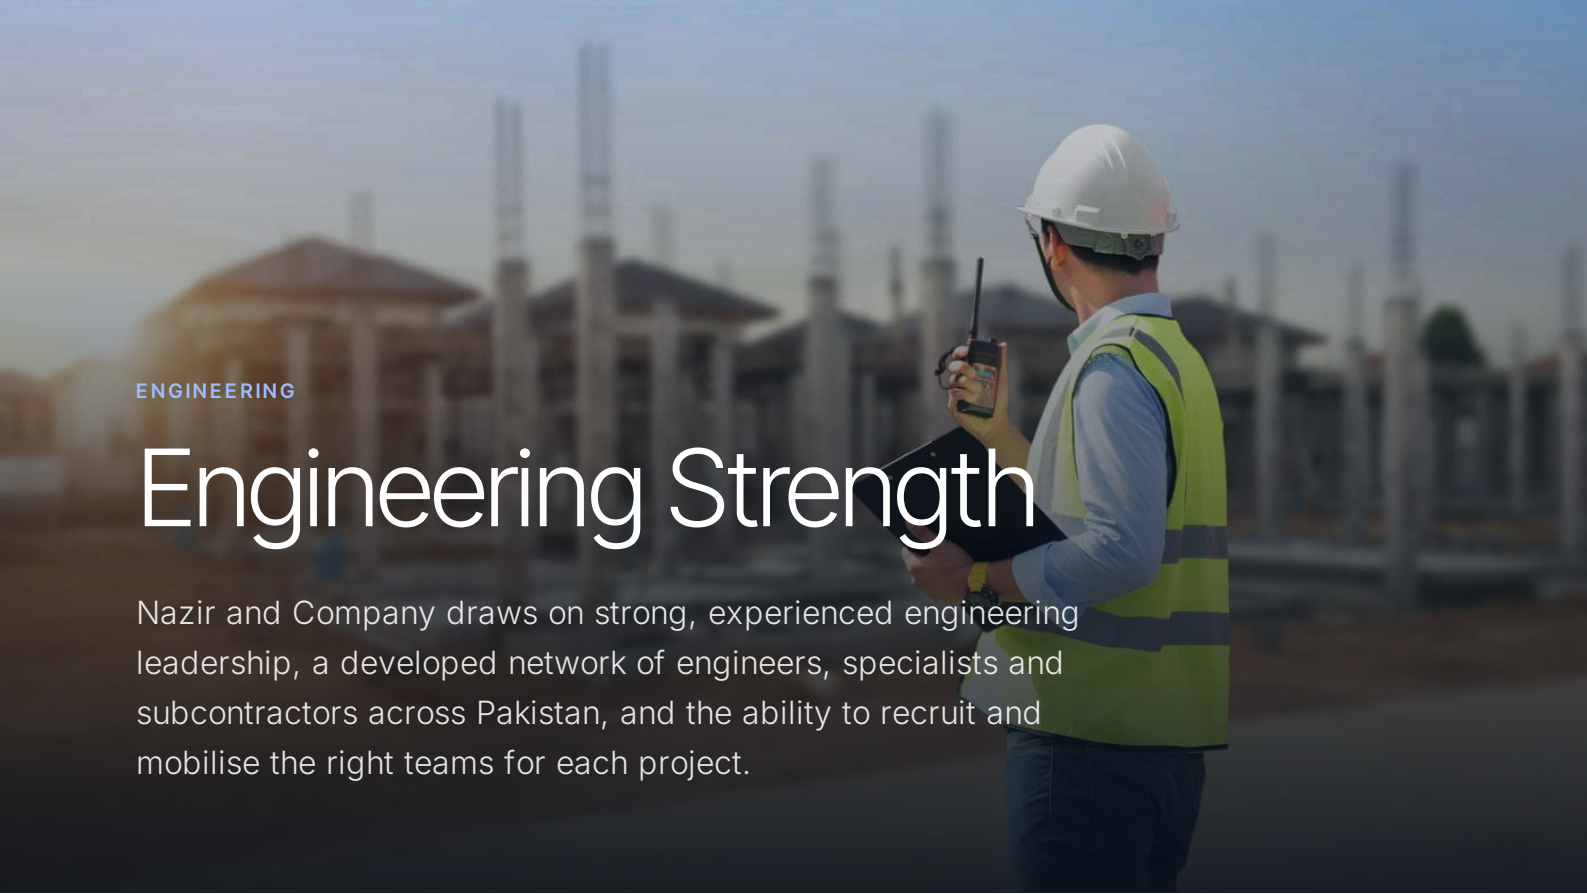

Adviser on civil works.

Behram Shahrokh Aslam

ELECTRICAL

Adviser on electrical works.

ENGINEERING

Engineering Strength

Nazir and Company draws on strong, experienced engineering leadership, a developed network of engineers, specialists and subcontractors across Pakistan, and the ability to recruit and mobilise the right teams for each project.

01

Experienced Leadership

Senior management and advisers with decades of experience delivering transmission, distribution and civil works in Pakistan and abroad.

02

Teams Built for Each Project

Engineers, supervisors and skilled crews are recruited and mobilised to match the scope, scale and location of each contract.

03

A Developed Network in Pakistan

Long-standing relationships with engineers, specialists, suppliers and subcontractors across Pakistan's power and construction sectors.

04

Equipment on Call

Access to a large fleet of construction and stringing equipment, mobilised per project.

End-to-End Delivery Across the Power Value Chain

01

Power Transmission

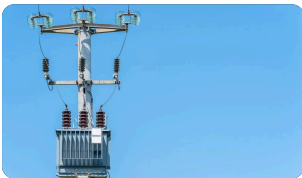

Overhead transmission lines from 66 kV to 500 kV and HVDC, delivered from foundations and tower erection to conductor stringing and complete turnkey lines.

02

Substations

Construction and civil works for grid substations, from the 500/220 kV substation at Peshawar to substations built with line contracts in Libya.

03

Distribution & Industrial Power

Medium-voltage networks, oil-field electrical systems and live-line maintenance for utilities and energy producers.

04

Civil Infrastructure

Motorways, bridges, water supply, sewerage and urban development for national and provincial authorities.

05

Telecommunications

Fibre-optic and communication networks integrated with high-voltage transmission.

What the Company Delivers

01

Overhead Transmission Lines, 66 kV to 500 kV and HVDC

Foundations, tower assembly and erection, conductor stringing and complete turnkey lines, including 500 kV lines in Pakistan and Malaysia, 400 kV lines in Iraq and Iran, 380 kV lines in Saudi Arabia and the ± 533 kV HVDC line from Songo to Apollo.

380/110 kV overhead lines and fibre-optic network, Makkah, Taif and Madinah	Saudi Arabia
Samnu–Sebha 220 kV double-circuit twin-bundle line	Libya

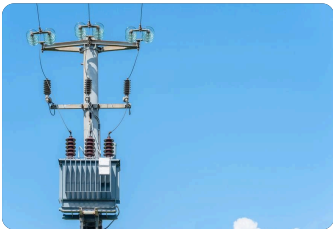

02

Substations and Grid Works

Construction of the 500/220 kV substation at Peshawar, civil works for 30/10 kV substations in Libya, and substations built with 33 kV line contracts in Libya, including four in the Messla field.

33 kV transmission lines and substations	Libya
Peshawar 500/220 kV substation	Pakistan

03

Distribution Networks, 11 kV to 35 kV

Overhead and underground 11, 13.8, 30 and 33 kV networks and cable works, mainly for utilities in Saudi Arabia, Libya and Iraq. Lines at 66 kV are listed under transmission.

Riyadh HV and LV overhead distribution network, up to 35 kV	Saudi Arabia
Distribution network up to 33 kV, Makkah, Taif and Madinah	Saudi Arabia

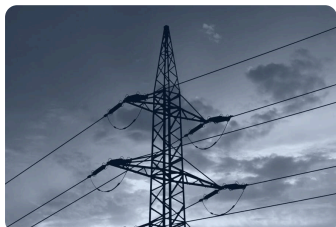

04

Industrial and Oil-Field Electrical Works

Well electrification, underground cables, overhead lines and substations in the Sarir, Messla and Nafoora fields, refurbishment of electrical installations in hazardous areas, and installation works at the Ammonia I and II plants.

Raguba hi-line replacement, Phase III	Libya
Ammonia I and II plants installation works	Libya

Maintenance, Civil and Communications

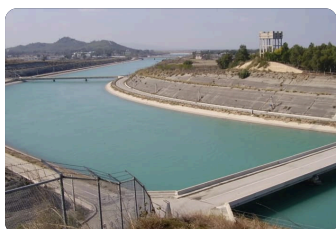

05

Hot-Line and Transmission Line Maintenance

Hot-line maintenance of a 138 kV line for Waha Oil Company, and maintenance of 220 kV transmission lines in Libya.

Hot-line maintenance of a 138 kV transmission line	Libya
220 kV transmission line maintenance (1994)	Libya

06

Civil and Infrastructure Works

Roads and motorways, carriageways and interchanges, airport landside works, hydropower civil works, water supply, sewerage and housing schemes.

Fatima Jinnah Town Phase I infrastructure, Multan	Pakistan
Fatima Jinnah Town Phase I water supply and paving, Multan	Pakistan

07

Telecommunication and Pipeline Works

Telephone exchange and cable networks in Iraq, mobile repeater stations in Saudi Arabia, and oil-field flow lines and trunk lines in Libya.

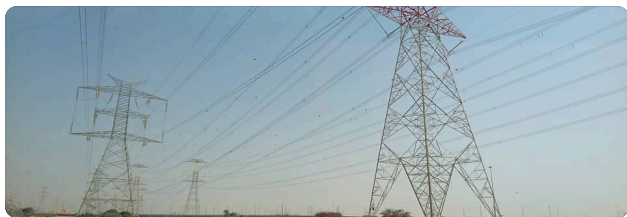

Underground telephone cable civil works, Aziziya to Gharyan	Libya
Mobile telecom repeater stations, Western Region	Saudi Arabia

Built for the World's Toughest Terrain

From the Sahara to the Arabian Peninsula, Nazir and Company delivers high-voltage transmission where conditions are most extreme and reliability matters most.

Contract values are shown as listed in the company profile, in the original currency; for joint ventures the value is that of the whole joint-venture contract. Photographs show the type of work and are illustrative.

LIBYA

A Legacy of Delivery in *Libya*

For over three decades, Nazir and Company built the backbone of Libya's power network: high-voltage lines from Tripoli to Benghazi and deep into the Fezzan, and critical electrical systems for the country's leading oil producers. Today the company is positioned to play a central role in the next chapter of Libya's grid.

From the Coast to the Fezzan

Nazir and Company built transmission along the coast from Misurata to Sirte and around Tripoli, a turnkey line from Benghazi to the eastern border, and lines south through Hun to Sebha in the Fezzan.

Power for the Oil Fields

For the Arabian Gulf Oil, Sirte Oil and Waha Oil companies, the company electrified wells, laid underground cables, built overhead lines and substations in the oil fields, and maintained a live line in service.

Landmark Lines

Samnu–Sebha: Transmission into the Fezzan

GECOL · 220 kV

Benghazi to the Eastern Border

S.O.E. · 220 kV · 750 km · Main contractor

Hun–Wadi Arial–Samnu Transmission

GECOL (formerly ELPCO) · 220 kV

Misurata–Sirte and the Tripoli Ring

GECOL (formerly ELPCO) · 220 kV

WORKING WITH MAIN CONTRACTORS

Electrical Scope, Delivered

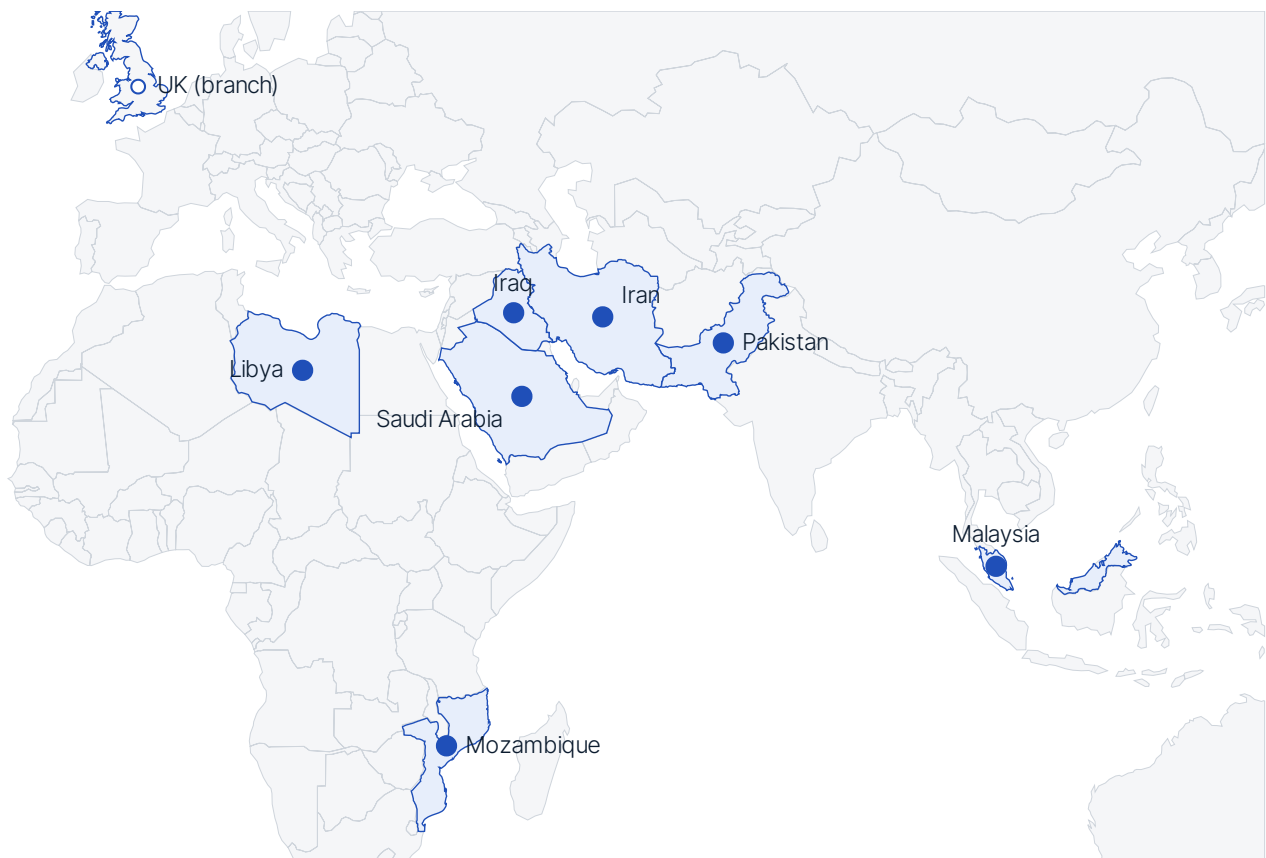

Nazir and Company takes on the electrical scope of transmission, distribution and oil-sector programmes for main contractors, delivered by its own teams, with a large fleet of construction and stringing equipment mobilised for each project.

Clients in Libya: GECOL (formerly ELPCO), GEC, Electrical Construction Company (ECCO), Sirte Oil Company, Arabian Gulf Oil Company, Waha Oil Company, S.O.E., ECT, Energoinvest, ITOCHU Corporation (formerly C. Itoh & Co.).

- 01 Overhead line foundations, tower erection and conductor stringing
- 02 Overhead distribution lines, underground cables and terminations
- 03 Substation civil works
- 04 Oil-field electrical works, including hazardous areas
- 05 Line maintenance, including live-line work

Seven Countries, Three Regions

Headquartered in Lahore, Nazir and Company has delivered across Asia, the Middle East and Africa.

Pakistan Headquarters · Transmission & infrastructure

Libya Transmission & oil-sector power

Saudi Arabia Transmission & fibre networks

Iraq High-voltage transmission

Malaysia 500 kV transmission

Mozambique HVDC transmission

Iran High-voltage transmission

The company has also held branch offices in Saudi Arabia, Libya, the United Kingdom, Malaysia and Mozambique.

CLIENTS

Trusted by National Utilities and Energy Leaders

Nazir and Company has delivered for the organisations that build and run national power, energy and road networks.
